MARKLIN Z SCALE LIMITED ISSUE CARS CATALOG

INTRODUCTION

In addition to the items listed in the regular (annual) catalog, Marklin produces additional freight cars by private contract in limited quantities. Until 1984, there were only a small number of these limited issue cars (LIC's). In 1984 and 1985, a larger variety of the basis 8600 refrigerator cars were produced as LIC's. In May 1986, Marklin expanded the number of body styles available for LIC's from one (the 8600) to three (8600, 8611 tanker, and 8615 container car).

In parallel with the Marklin LIC production, private printers have purchased cars in quantity from Marklin (mostly 8600's) and have reprinted the cars to customer specifications. As with Marklin printed LIC's, there was only a small number of privately printed LIC's before 1984, with an increase in variety since that time.

Before May 1986, the minimum order size for a Marklin printed LIC was 500. Such a number was generally difficult to sell. The private printers satisfied the demand by producing LIC's in smaller quantities, usually around 100. In May 1986, Marklin reduced the minimum order size to 100, but the fixed costs of production forced them to ask such a high unit price at the 100 level that most customers have chosen a size of 200 or 300. This should reduce the demand for privately printed cars, but it is too early to ascertain the impact.

The quality of LIC's ranges from terrible to breathtaking. Marklin uses strict quality controls and rarely releases an undesirable LIC. In general, Marklin printed LIC's have a quality advantage over regular issues because the plates used in the printing never get worn. The images are almost always sharp. The effect is similar to that of striking a coin with a new die compared with using a worn die.

Beginning in mid 1983, all Marklin printed LIC's carry the firm's insignia (a stylized letter M) to indicate "original Marklin printing".

The LIC's included in this catalog are restricted to those issues that have been offered on Modellbahn Freunde Ltd. (MF) price lists. As we produce or otherwise obtain additional LIC's for future lists, they will be included here.

ORGANIZATION

The catalog is organized by car type: 8600, 8611, 8615. Within car type, the LIC's are listed in ascending sequence by MF catalog number.

For each LIC, the following information (if known) is provided:

- 1) xeroxed image of car
- 2) NUMBER: MF catalog number
- 3) YEAR: year produced
- 4) SOURCE: MA=Marklin, MF=us, PP=private printer
- 5) NAME: firm and/or product depicted on car
- 6) BASE COLOR: color of sides of car (customary base color is white)
- 7) ROOF: roof color (type 8600 only) (customary roof color is silver)
- 8) PRINTED COLORS: colors of the printed design arranged in (approximately) descending amount of use
- 9) COUNTRY: country of the car
- 10) ISSUED: number issued
